

Worcester, MA - USA June 2010 - Absolute Green Energy Corporation is pleased to announce the hiring of Two Interns for the summer 2010 at their headquarters in Worcester, MA.

Absolute Green Energy has hired Two interns to help with Developing our Solar Business and Engineering strategies. These interns both have strong academic backgrounds, and yern from Environmnetal and Engineering fields.

These interns work with us through the end of the summer, time during which they will organise and host three seminars aimed at helping Plumbers, Electricians, and Contractors Break into the Solar PV/ Thermal Installation Market.

MEET OUR INTERNS

Chris Lehman,

Chris is a fourth year Mechanical Engineering student at The Worcester Polytechnic Institute, from New Hampshire. He is in active preparation of a comprehensive guide for the planning and installation of Solar PV/ Thermal systems for residential use. These are designed to provide the typical Contractor, Plumber, or Electrician the resources necessary to fully install these systems on their own.

At WPI, Chris focused his major project work in the area of renewable energy. In his three years there so far, he's worked on investigating energy generation from offshore tidal power, as well as an in depth study of wind energy in the US. During this upcoming year, he will also complete work on an actual design project building a system to generate power from vortex induced vibrations, which are caused by water currents flowing over cylindrical tubes.

Lila Derick Ajumni, MA

Derick has a Masters Degree in Environmental Science and Policy with skills in Green Business Management from Clark University here in Worcester. He is an *OSHA 10 Certified* Environmental Science and Policy Analyst.

Derick is responsible for various aspects of developing our approach to building a robust, profitable business in renewable energy systems. He is also responsible for documenting best practices for various aspects of selling and implementing residential and commercial solar PV/ thermal water heating systems.
